## THE MEASUREMENT OF SOCIAL CAPITAL

Dr. Villalonga-Olives will talk about how to collect data on social capital using questionnaires. She will present on the challenges to measure social capital, the development and adaptation of questionnaires to collect data, the problems of differential item functioning and discuss solutions to these problems.

# ESTER VILLALONGA OLIVES

**FREE WEBINAR**

ESTER VILLALONGA-OLIVES

Dr. Villalonga-Olives is an Assistant Professor at University of Maryland Baltimore since 2017, after being a Research and Teaching Fellow at the Harvard TH Chan School of Public Health. She is a social epidemiologist and an expert in the process of adaptation and development of patient reported outcomes. Her research interests are related to the study of the social determinants of health, with an emphasis on social capital, health inequalities and a focus on the design of health interventions. (from here, only if there is space) Prior to her time on faculty, she received an award from the Spanish Society of Epidemiology (SEE) to study at the European Epidemiology Program (Florence, Italy) and performed on-site public health interventions serving non-governmental organizations in India and Cuba. She served as an elected board member of the International Epidemiology Association for 10 years.
